### DETAILED ACTION

#### *Allowable Subject Matter*

1. Claims 1-32, are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:  
The closest prior art shows the method for identifying nodules in an anatomical volume segments a 3-D image volume by controlled voxel growth from seed points but does not disclose calculating a first attribute volume and a second attribute volume for the region of interest, the first attribute volume and the second attribute volume each comprising a plurality of voxels, each voxel being defined by a set of x,y,z coordinates and a data value; selecting a first set of voxels from the first attribute volume that have a data value within a first attribute data value range, the first set of voxels representing a preferred feature of the region of interest; selecting a second set of voxels from the second attribute volume that have a data value within a second attribute data value range, the second set of voxels representing the preferred feature.
